

# Comparing the success of platforms in hosting top-selling video games

While Sony Platforms have more games ranked in the top 500 by sales, games on Nintendo Platforms have a higher median ranking.

Three out of the top 5 platforms with the most games ranked in the top 500 are Sony Platforms

However, Nintendo has 4 out of the top 5 platforms with the median video game ranking closest to 1

Nintendo and Sony have been the most consistent in hosting top-selling games over time. Microsoft has only recently become competitive.
